DETAILED ACTION

1. Claims 1-38 have been presented for examination.
2. Claims 1-38 have been rejected.

Drawings

3. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-38 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Weinberg et al. (572). Weinberg et al. teaches the limitations as recited in claims 1-38

as software and systems that are generating load tests using server access logs and Vusers that are simulated or virtual users created by recording and replaying user sessions.(col. 32, lines 38-47) The user sessions are modifiable and traceable. Metrics are recorded for the Vuser, each having its own client identity and can be grouped with other Vusers to represent different user interactions on the network. Filters are disclosed that include global filtering at col. 15, lines 27 and figures 1, and 4-6. Further see Figures 1-32, especially figures 25-32, with related text, a more detailed description of these services starts at col. 2, lines 28 et seq. and is specific to the virtual users (Vuser) for testing the network starting at col. 31, lines 61 et seq.

Conclusion

6. The prior art made of record, P.T.O. 892 and not relied upon is considered pertinent to applicant's disclosure.
